GEODERMA

Contents Volume 89, 1999

Preface vii

Geostatistics in soil science: state-of-the-art and perspectives
P. Goovaerts 1
Spatial aggregation and soil process modelling
G.B.M. Heuvelink and E.J. Pebesma 47
Spatial prediction of soil properties using environmental correlation
N.J. McKenzie and P.J. Ryan 67
Relationship of the presence of a non-calcareous clay–loam horizon to DEM attributes in a gently sloping area
D. King, H. Bourennane, M. Isambert and J.J. Macaire. 95
Using relief parameters in a discriminant analysis to stratify geological areas with different spatial variability of soil properties
W. Sinowski and K. Auerswald 113
A sampling scheme for estimating the mean extractable phosphorus concentration of fields for environmental regulation
D.J. Brus, L.E.E.M. Spätjens and J.J. de Gruijter 129
Comparison of two modes of surface water control using a soil water model and surface elevation data
M.F.P. Bierkens, P.J.T. Van Bakel and J.G. Wesseling. 149

Research Papers
Turnover of organic matter in differently textured soils. I. Physical characteristics of structurally disturbed and intact soils
P. Schjønning, I.K. Thomsen, J.P. Møberg, H. de Jonge, K. Kristensen and B.T. Christensen 177
Turnover of organic matter in differently textured soils. II. Microbial activity as influenced by soil water regimes
I.K. Thomsen, P. Schjønning, B. Jensen, K. Kristensen and B.T. Christensen 199
Effects of added paramagnetic ions on the ^{13}C CP/MAS NMR spectrum of a de-ashed soil
R.J. Smernik and J.M. Oades 219
Retention of copper by desert sands coated with ferric hydroxides
M.S. Al-Sewailem, E.M. Khaled and A.S. Mashhady 249
Phosphorus availability in a forest soil determined with a respiratory assay compared to chemical methods
M. Demetz and H. Insam 259
Carbon and nitrogen stocks in the soils of the Amazon Region
N.H. Batjes and J.A. Dijkshoorn. 273
Precipitation and dissolution of gibbsite during weathering of andesitic boulders in humid tropical West Java, Indonesia
B. Mulyanto, G. Stoops and E. Van Ranst 287
Prevalence and initiation of preferential flow paths in a sandy loam with argillic horizon
C.A. Perillo, S.C. Gupta, E.A. Nater and J.F. Moncrief. 307

The representative elementary area (REA) in studies of quantitative soil micromorphology
A.J. VandenBygaart and R. Protz 333

Book Reviews 347
